

GoVV Emobility Solutions

Research-Backed Global E-Mobility Solutions

Sector: Clean Technology · Electric Mobility

GoVV Emobility Solutions addresses worldwide electric-mobility needs with research-backed designs that prioritise efficiency, reliability and scalable manufacturing.

Technical Focus

- Electric powertrain and battery-system design
- Thermal and structural optimisation for vehicle integration
- Control software and telemetry for fleet readiness

Gonagoor Support Provided

- Seed funding for concept-to-prototype development
- Technology foundations and platform architecture
- Mathematical modelling for range, efficiency and durability
- Prototyping and subsystem validation
- Market access and channel partnership support
- Grant and funding support for clean-tech initiatives
- Product development and manufacturing scale-up support

Impact & Outcomes

- Developed research-backed design specifications for e-mobility products
- Built validation plan aligned with global safety and efficiency standards
- Created pathway to pilot deployment and manufacturing partnership

Prepared by Gonagoor Technologies — Where research meets engineering.
